

AMA by Sanket & Riya

Special class

HELLO WORLD

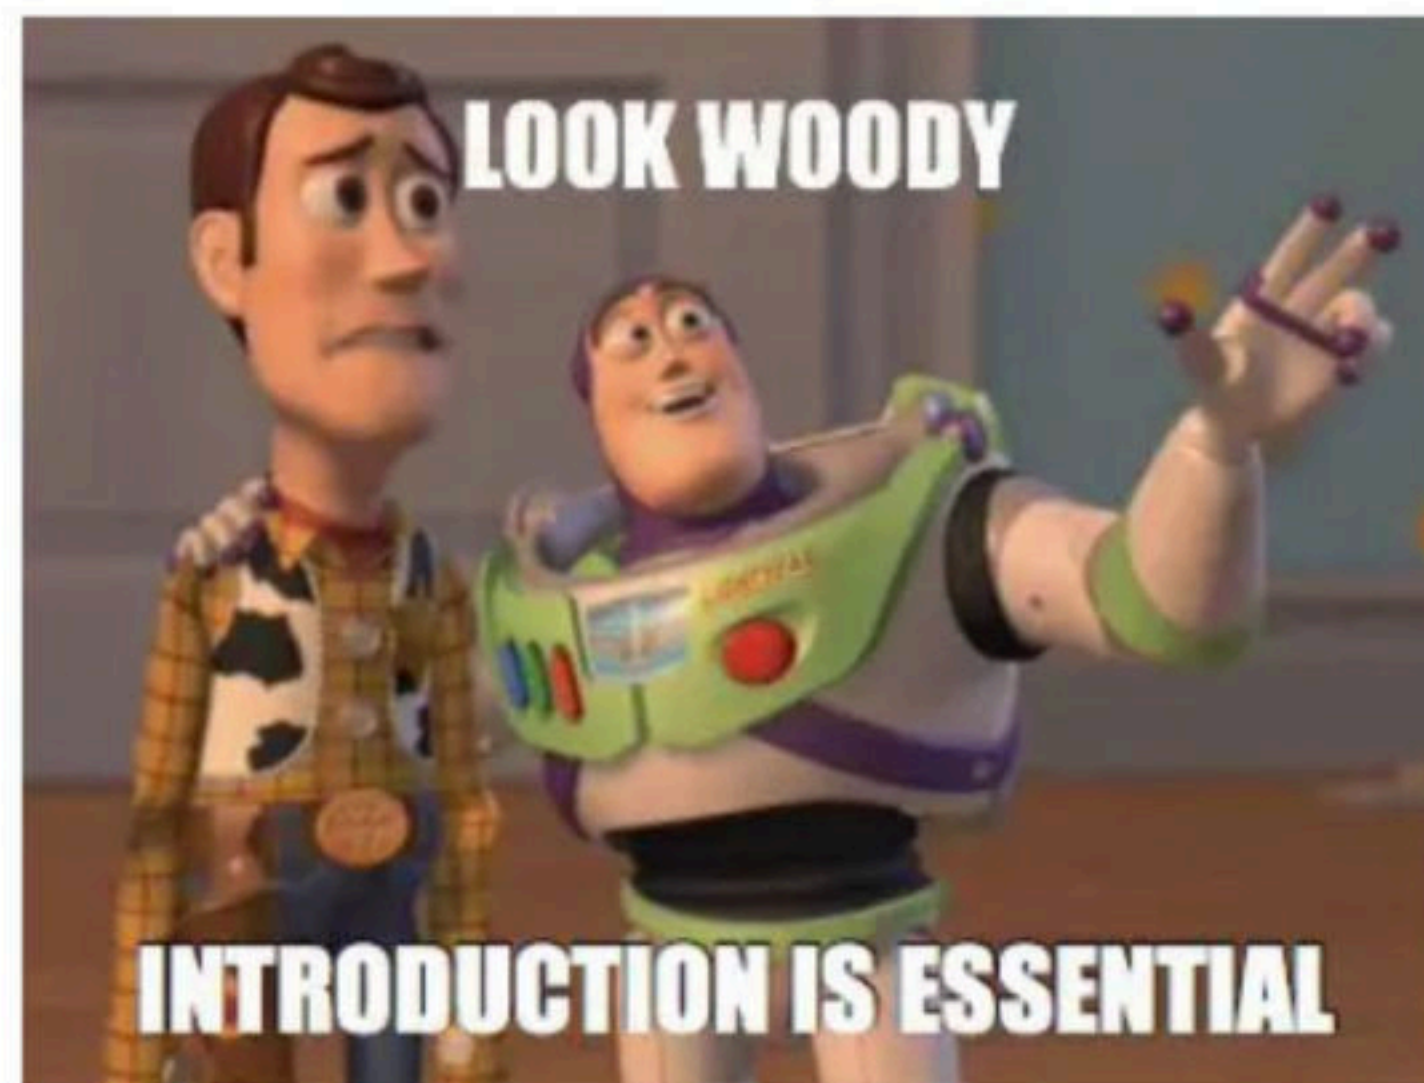

Placement Strategy And Tips AMA

With Sanket Singh and Riya Bansal

Let's crack Competitive Programming together!

Sanket Singh

- Software Development Engineer @ **LinkedIn**
- Former Software Developer @ **Interviewbit/Scaler**
- Former Product Engineer @ **Coding Blocks**
- Cracked **Google** Summer Of Code 2019 under **Harvard University**
- Offers From **Linkedin, Sprinklr, Dunzo, Works Application(Singapore), Interviewbit, Grofers, Splash Learn**
- Former Research Intern @ **ISRO (Indian Space Research Organisation)**
- Taught 7,500+ programmers in Data Structures, Algorithms and Fundamentals of Computer Science
- Got **Rank 1** in Codechef Long Challenges
- Won **Infosys** Digital Make-a-thon

Riya Bansal

- Software Development Engineer @ **Flipkart**
- Former Software Developer @ **Interviewbit/Scaler**
- Former SDE Intern @ **American Express**
- Former Mentee @ **Amazon**
- Offers From **Flipkart, Works Application(Singapore), Interviewbit, Grofers**
- Former Google Women Techmaker Scholar and Github Campus Expert

Q1:How to apply for product based company internship and how will be filtered from others and get selected?

Q2: Is it mandatory to have atleast one internship before getting into a job?

Q3: What are the skills required for a 3 tier students to get internship/full time job in good product based companies ?

Q4: What are some Data Structure and Algorithm topics that should be heavily focused on from Placement point of view?

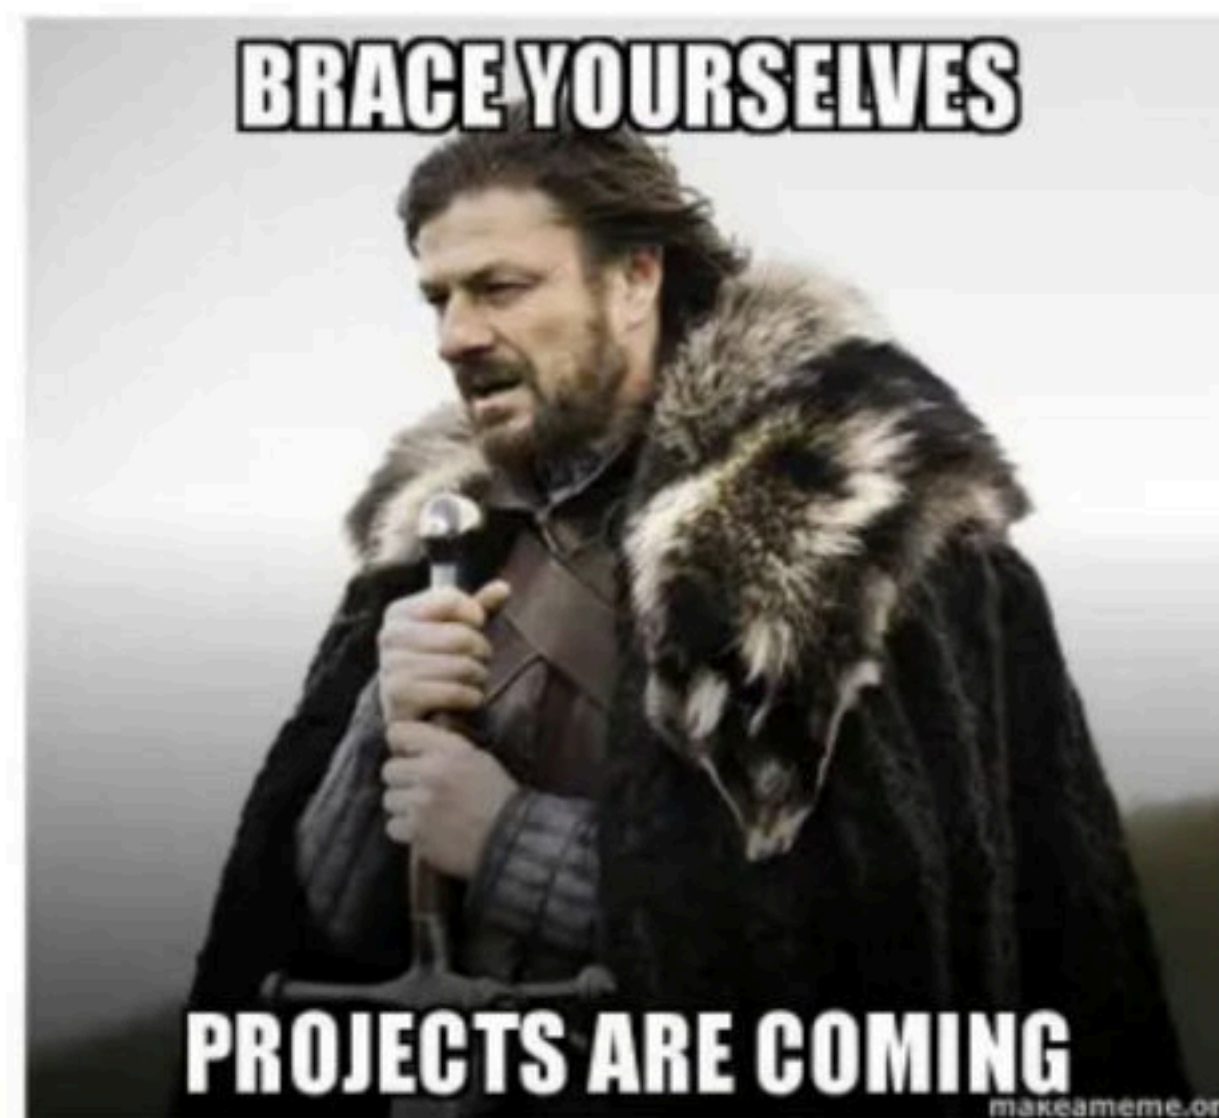

Linked List data structures be like:

I know a guy who knows a guy

Q5: I am from tier 2 college, my focus is on off-campus placement and internship, can I crack MNCs(faang) with only doing Competitive Programming, I not into development, is it necessary to make good projects to crack their internship?

Q6: Is system design is necessary for freshers in interview?

Q7: Currently, I am in 3rd year and just started CP ? What is the roadmap for 3rd year beginner for CP as well as for Interview Preparation

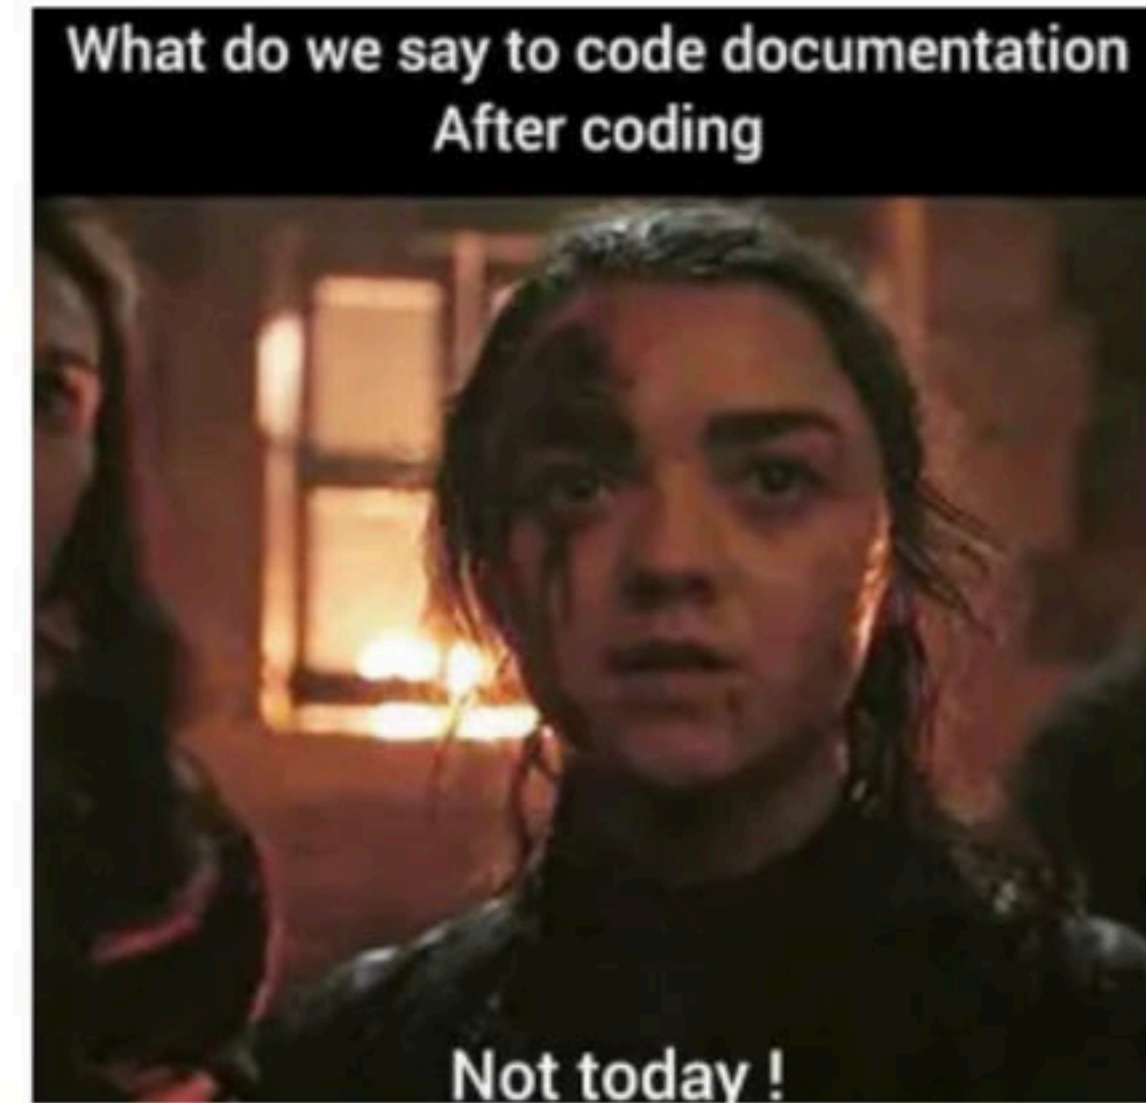

me during college placements

Me: I don't know Competitive Programming,
but I have worked in
Android dev, Django backend, Angular...

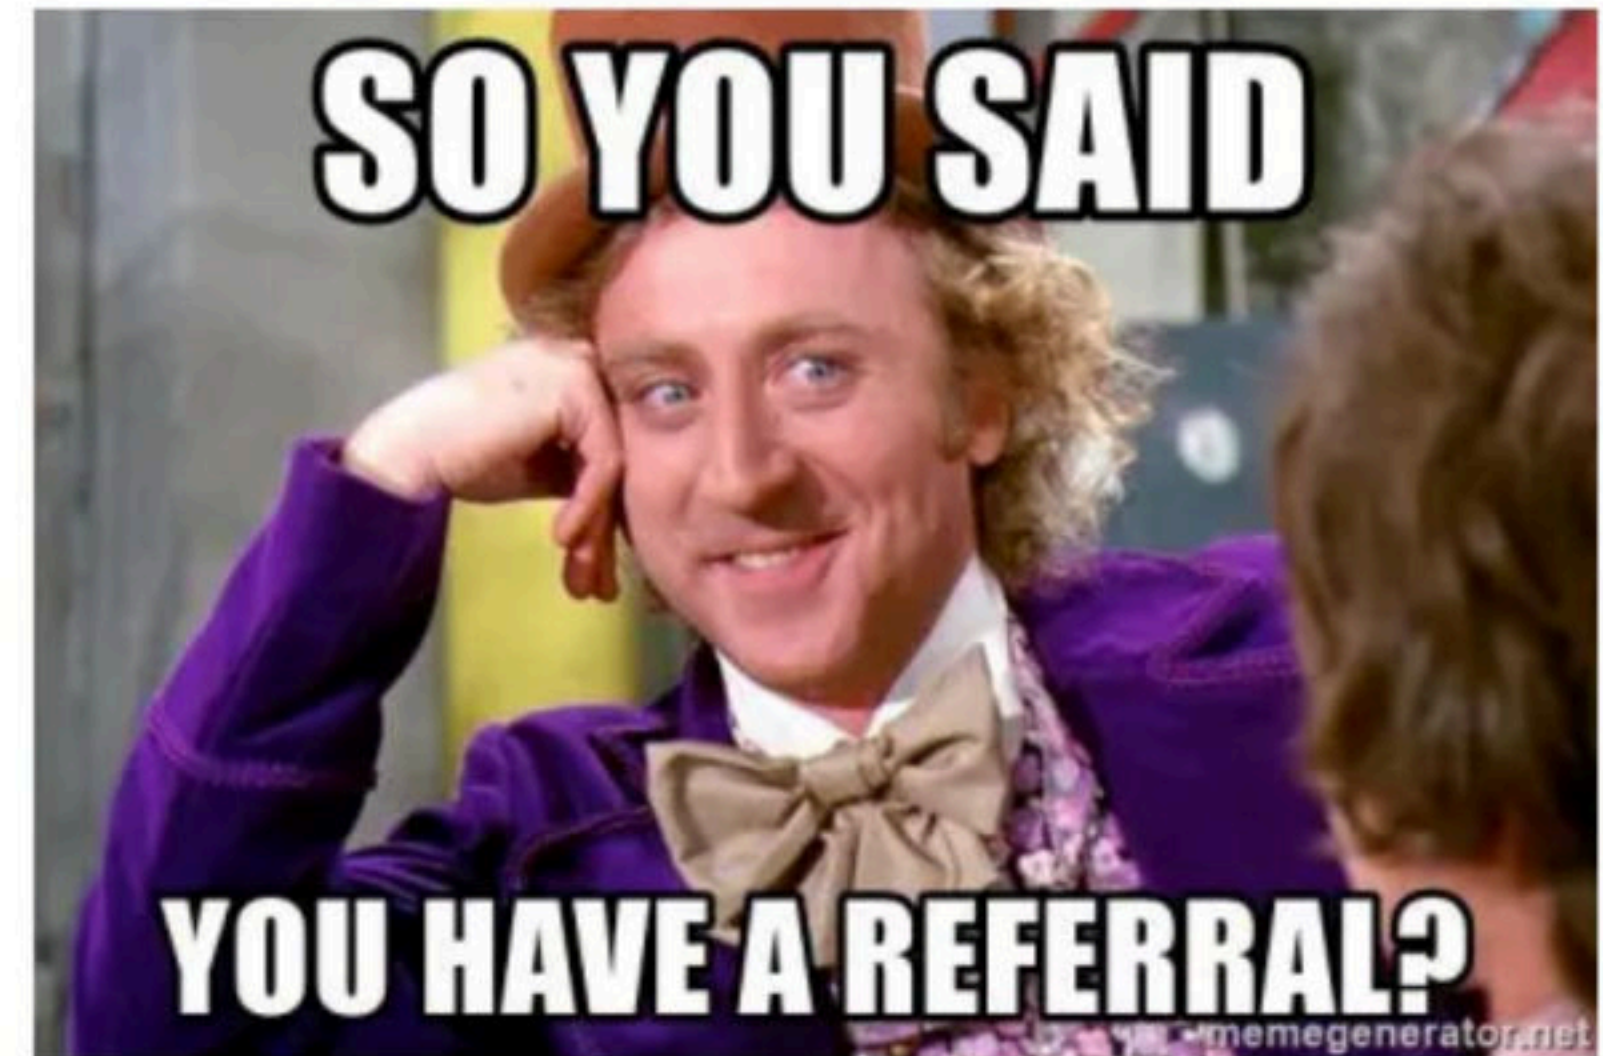

Q8: What would you say w.r.t which type of skillsets and technical assets should be honed in our early years for our experience in internships to be a slightly smooth sailing and confident experience?

Q9: How to get referrals and apply to dream companies from tier 2 or 3 colleges?
How to prepare for offcampus interviews?

Q10: What tips would you give for on going on campus placements?

Q11: Which technologies and how many languages one should know as fresher.

Q12: How much we need to focus on theory subjects like (OS, DBMS, CN etc) and how much on competitive coding.
