Q1. I am from mechanical engineering department, how does that affect my scope of becoming a good programmer, I always feel inferior to my CSE classmates. What CSE subjects/topics should I cover in order to be at par with them.

Q2. Is there any company which gives priority or has placement drive exclusively for females?

Q3. How to get to know all the opportunities and preparation for women in tech?

Q4. What chances and opportunities are there for women for joining in Fang companies (off campus) after college?

Q5. Ours is women's engineering college, how should we motivate the girls towards competitive programming and more towards product based companies

Q6. How to get more internship opportunities in final year of graduation so that we improve our industrial knowledge?

THANKYOU
